Claims 18-38 are pending in this application.

Claims 18-38 are pending to which the following grounds of rejection are or remain applicable.

Response to Arguments

Applicant's arguments filed 28 April 2005 have been fully considered but they are not persuasive. The rejection made in the paper mailed 10 December 2004 under 35 U.S.C. §103(a) over Sunshine et al. is maintained and hereby repeated for the reasons set forth in the previous office action and those set forth below.

Applicant asserts that determination of obviousness cannot be based upon the hindsight combination of components selectively culled from the prior art to fit the parameters of the patented invention.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In this case, ibuprofen suspension is well known and in the public domain.

Art Unit: 1614

Sunshine et al. teach a formulation of ibuprofen and pseudoephedrine in a liquid formulation. Syrups and elixirs are specifically recited. The disclosure of Sunshine et al. teaches suitable pharmaceutical diluents, excipients or carriers suitably selected with respect to the intended form of administration i.e. elixirs, syrups, etc. The word **etc.** in the disclosure means that the disclosure is not limited to those elements recited, and includes those that would be obvious to one of ordinary skill in the art, such as adding suspending agents to an elixir/syrup formulation for an agent that is insoluble in water. A child with flu symptoms that include aches/fever along with congestion would combine agents such as ibuprofen suspension and pseudoephedrine. Alcoholic elixirs are contraindicated for children; hence a suspension would be a safer formulation. Ibuprofen suspensions are well known for use in children and for those who cannot swallow tablets. Pseudoephedrine syrup is well known and employed for congestion in children. It would have been obvious to combine these two well-known agents into one formulation for ease of administration, particularly in children whom tend to spit out bad tasting medications or medications that are administered orally in large volume.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1614

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
